

Recommended Billing Codes for the Anatomotor Table

For Cervical/Lumbar Mechanical Traction - Use 97012

For Massage Roller - We do not recommend the use of 97012 for Intersegmental Traction. Rather, we suggest billing roller massage under code 97039 for "Others". You should also include the following explanation in your submission:

"Electro-mechanical deep-kneading soft-tissue therapy with heat and vibration helping to induce articulating motion to each segment of the spine."

Progressive Innovation. Legendary Quality.
